The 2002 Directory is a gateway to more than two thousand useful pest control items (for Quick Access see Box A on page 2 and the Index on page 38). Many of these products, services, or beneficial organisms have come to our attention in connection with articles published in BIRC's *IPM Practitioner* or the *Common Sense Pest Control Quarterly*, through IPM programs designed by our staff, or via recommendations from colleagues.

This Directory is unique because it is compiled by IPM technical experts, includes specific product descriptions, and is organized in concert with the IPM decision-making process (see *The IPM Practitioner* 13(11/12):1-9). All information is current, and is constantly updated on BIRC's computerized database system. It is divided into four management sections: Insects, Plant Disease, Vertebrates, and Weeds. Within each section, information is listed in alphabetical order by specific pest grouping. The IPM decision-making steps used to organize individual pest listings include Identification & Monitoring plus a consideration of Physical, Horticultural, Biological, and Least-Toxic Chemical Control methods.

For each product, specific descriptions are included when applicable, followed by the company name and the product name when available (in parentheses). Addresses and phone numbers of manufacturers and suppliers are listed alphabetically by company name at the end of the Directory. An Index to the Directory follows the List of Addresses.

**Feedback and Disclaimer**

Two caveats apply to this information. First, to the best of our knowledge, these products, services, and beneficials are effective and are produced by reputable companies. However, they are used at your own risk, and BIRC makes no guarantees or warranties regarding any listing. To help us maintain quality control, we encourage you to contact us about your experiences, both positive and negative, with any of these companies or resources.

Secondly, all information was current at press time. However, pest control is a rapidly changing field: products come and go, and companies change hands and locations on a regular basis. Therefore, if you fail to reach any of the companies listed here, contact us at PO Box 7414, Berkeley, CA 94707; 510/524-2567.

To obtain speedy delivery and receive advice from experienced sources, we recommend that you order directly from pro-

**Beneficial Insects**

Both domestic and international producers of beneficials found in the Directory are listed by alphabetical order in the List of Addresses at the end of the Directory. Names and addresses of Biobest distributors are listed separately in Box B at the beginning of the List of Addresses, and Koppert distributors are listed in Box C.

Shown here is the big-eyed bug, *Geocoris punctipes*, a predator of aphids, lygus bugs, caterpillars, mites, and a number of other arthropod plant pests. Sources for this insect and many other least-toxic or non-toxic pest control products can be found in this Directory.

**Acknowledgment**

The *IPM Practitioner* would like to thank all the companies who supplied us with information, the National Biological Control Institute for a grant to help with production (see page 37), the generous support of BIRC members, our advertisers, and William Quarles and Jennifer Bates who did all the clerical and production work on this issue.
Box A. Quick Access

If you are looking for a specific item, see the Index on pages 38 and 39. To find a remedy for your pest problem, look in one of the four major sections according to whether the pest is an insect (arthropod), plant disease pathogen, vertebrate, or a weed. Except for the weed section, pests are listed by alphabetical order in each of the major categories. When you have found the pest listing, there are separate sections for Identification and Monitoring, and for Physical, Horticultural, Biological, or Least-Toxic Chemical Controls. For instance, to find a parasitoid to control aphids, look in the Insect Management section under Aphids, then under Biological Controls, then under Parasitoids. To find a trap for a raccoon, look in the Vertebrate section under Raccoons, then under Biological Controls. When you have found a listing of traps, Brand name items are enclosed in parentheses, and are attached to a series of suppliers. The first supplier on the list is the manufacturer.

If the product you are seeking is not in the Index, you must know how the product is used, and for which pests, in order to immediately find the listing. If the item you are seeking is hard to categorize, each of the four main divisions has a Miscellaneous section. If you are looking for a specific item such as insecticidal soap, diatomaceous earth, or silica gel, and do not know which pest category you should look at, browse major pest sections such as Ants and Aphids first, then browse Miscellaneous.

Benefits

To find beneficial insects or arthropods, look first in the Index. If there is no listing in the Index, find the appropriate major section, then the alphabetical listing of the pest you are trying to control. When you have found the pest listing, then look under Biological Controls. Parasitoids available to fight your pest are listed first, followed by effective predators. Beneficials are listed in alphabetical order by scientific name.

A list of suppliers follows every item in the Directory. To find the addresses and phone numbers for the suppliers listed, look up each supplier by alphabetical order in the List of Addresses at the end of the Directory.

Sitotroga cerealella (moth eggs for Trichogramma rearing medium): Kunafin

Supplies for rearing insect pathogens: International Mycological Institute • Oliver • Invitrogen

Pollination aids:
Ecogen (Bee-Scent) • Phero Tech (Fruit Boost)

Pollinators: bumble bee, Bombus spp.: W. Neudorff • Biobest • Koppert • Natural Insect Control • Bio Bee

Predators:
Chinese praying mantid, Tenodera aridifolia sinensis: ARBICO • Planet Natural • M & R Durango • Natural Insect Control • Natural Pest Controls • Peaceful Valley • Praxis • Smith & Hawken • A-1 Unique • Nature’s Control • The Green Spot

Red hybrid earthworms, Lumbricas sp.: A-1 Unique • Rincon-Vitova

Pesticide Application Equipment

Application equipment for structural pest control:
B & G • Harmony • Peaceful Valley • Professional Equipment • Vopak

Bait applicator:
Specialty Products (BaitGun) • Whitmire • Blue Diamond
Dusters:
B&G Equipment (B&G Dusters) • AgrEvo (Actisol) • Planet Natural, Nitron, Peaceful Valley, Gardens Alive, Charley’s (Dustin Mizer) • Vopak (Getz Gun) • Parker (P.E.S.T. Power Applicator) • Woodstream, Peaceful Valley (Pest Pistol)

Electrostatic sprayers/dusters:
Electrostatic Spraying Systems • Pristine • Bee Tee • Agr Evo

Sprayers:
Planet Natural • Bee Tee, Pristine (Murayama) • Gardener’s Supply (Spraydoc) • Green Pro • Harmony • Vopak • Gempler’s

Tool for Injecting Wall Voids: B & G

Protective Skin Coating: Gloves in a Bottle

Respirators:
BWS • Harmony • Lab Safety Supply (full hood respirator) • Survivair (Series 86 Disposable APR) (Call Survivair for local distributors) • Vopak

Production Supplies
Irrigation Equipment: Harmony
Organic Fertilizer: Gardener’s Supply • San Jacinto • Harmony • Peaceful Valley • New Era

Recycling Resources
Compost, Used Materials: Calmax • New Era
Portable Bailers to Recycle Solarization Plastic: Kennco

PLANT DISEASE MANAGEMENT

CROWN GALL DISEASE

Biological Controls
Microbial Fungicides:
Agrobacterium radiobacter strain K84: AgBioChem, Necessary, Harmony (Galltrol-A, Galllex) • New BioProducts, IPM Labs (NoGall K1026) • Western Farm

PATHOGENS
of Flowers, Foliage and Fruit

Identification & Monitoring
Apple scab forecasting equipment:
Harmony (Qualimetrics Hygrothermograph) • Automata (Scab Off software)
Automata (Grapemold)
Lettuce downy mildew prediction software:
Automata (Let Down)

Indicator plant (Summer Madness petunia) for tomato spotted wilt: Ball Seed
Tomato spotted wilt virus detection kit: Agdia
Plant disease detection kits: Neogen (Reveal)
Weather monitor & disease forecasting system (for fire blight):
Gempler’s (MARYBLYT)

Physical Controls

Fungal Barriers:

Antitranspirants:
Green Pro (Vita Coat) • Miller (Vapor Gard) • PBI/Gordon (Transfilm) • Precision (Preserve) • Wilt-Pruf (Wilt-Pruf) • Nature’s Touch (Leaf Cote Clear)
Peaceful Valley

Habitat:
Styrofoam blocks to increase ventilation:
Beaver Plastics, First Choice (Ventblocks)

Horticultural Controls

Disease-Resistant Roses:
Heritage Rosarium • High Country • Horticola • Heirloom • Jackson and Perkins • Lowe’s Own • Vintage Gardens • Rose Catalog • American Rose Society

Biological Controls

Microbial Fungicides:
Ampelomyces quisqualis (biofungicide for powdery mildew):
Ecogen, Harmony, Plant Health Care (AQ-10)
Bacillus pumilis (biofungicide): Rincon-Vitova (Activate)
Bacillus laterosporus (Rosa Flora): Better Flora
Bacillus subtilis (Serenade): AgraQuest
Candida oleophila (for postharvest protection of citrus):
Ecogen (Aspire)

Compost tea brewers: Growing Solutions • SoilSoup • Microbrewer • Earth Tea
Pseudomonas fluorescens (for fire blight): Plant Health Technologies, Peaceful Valley (Blight Ban)
Pseudomonas solanacearum (non-pathogenic for bacterial wilt control): Natural Plant Protection
Trichoderma harzianum (for grey mold): Makhshim-Agan (Trichodex) • Biorregaard • Binab (Plant Gard)
Trichoderma sp. (for chlorotic vine leaf curl): Binab (Binab-T)

Streptomycin antibiotic (for pear, apple fire blight):
Peaceful Valley (Agrimycin)

Least-Toxic Chemical Controls

Baking soda with sticker: Gardener’s Supply (Remedy) • Monterey • Peaceful Valley
Calcium Foliar Spray: Bonide (Rot-Stop)
Cinnamic aldehyde: Emerald (Valero)
Garlic and Oil: JH Biotech, Harmony (GC-3)
Copper & Sulfur Fungicides:
- Planet Natural (micronized sulfur) • Monterey (Nordox, Copper Count N, Micronized Sulfur) • Peaceful Valley, The Natural Gardener (Kocide, Bordeaux) • Harmony • Bonide, Gardener’s Supply (Bonide Garden Dust) • Gardens Alive (copper soap) • Woodstream (Rose and Flower) • Integra, Necessary (Concern fungicidal soap) • Stoller (TopCop)
Flowable sulfur formulation:
- Woodstream, Harmony, Charley’s, (Safer Garden Fungicide) • Peaceful Valley • Stoller (That)
Fungicidal Soap (copper and soap):
- Gardens Alive (Soap Shield)
Peroxide Oxidants:
- Biosafe (Oxidate, Zero Tol)
Calcium Thiosulfate:
- The Green Spot • Best Sulfur Products
Highly refined oil (from petroleum) & sulfur:
- Necessary • Peaceful Valley
Mint oil:
- Soil Technologies (Fungastop)
Neem Products (for mildew, botrytis, rust):
- Certis, Harmony, Peaceful Valley (Trilogy, Triact) • Greenlight • San Jacinto (Organica)
Horticultural Oil: See APHIDS

ROOT PATHOGENS

Identification and Monitoring
Detection kit for pathogens:
- Neogen (Reveal)

Physical Controls
Heat, Steam and Hot Water:
- Heat (electric soil sterilizer): Olson, Great Lakes, Gemplers
Hot Water:

Portable Bailers to Recycle
Solarization Plastic:
- Kennco Manufacturing
Steam Machines and Boilers:
- Sioux • Saskatoon

Biological Controls
Microbial Fungicides:
- Burkholderia cepacia: Market VI (Deny)
- Fusarium oxysporum (non pathogenic): Natural Plant Protection
- Gliocladium virans (for pythium, rhizoctonia):
  - Certis, Harmony, Gardens Alive (SoilGard)
- Gliocladium sp. (for fusarium, pythium): Kemira, Hydro-Gardens (Micostop) • AgBio (Micostop) • Peaceful Valley • Rincon-Vitova • Harmony • Plant Health Care
- Streptomyces sp.; Spray-N-Grow (RootGuard)
- Streptomyces lydicus (for fusarium, rhizoctonia, pythium):
  - San Jacinto (MicroGro)
- Trichoderma harzianum (soil treatment for root pathogens): BioWorks (Rootshield, Turfshield) • Binab • Wilbur-Ellis (Bio-Trek, for brown patch, dollar spot on golf courses) • Borregaard • Harmony
- Trichoderma atroviride (cold tolerant): Ag Tech (Plant Helper)
- Trichoderma sp. (for growth promotion): Plant Health Care (Compete)

Disease-Suppressive Seed or Soil Treatment:
- Bacillus subtilis: Gustafson (Kodiak) • Plant Health Care • Rincon-Vitova (Activate) • AgraQuest (Serenade)
- Bacillus uniflagellus: Rincon-Vitova (Activate)
- Bacillus spp. (mixture): Rincon-Vitova
- Burkholderia cepacia: Market VI
- Trichoderma harzianum (seed treatment for root pathogens): BioWorks (Rootshield, Planter’s Box) • Agricola Mas Viader • Plant Health Care

Disease-suppressive peat moss:
- Southern Importers (Southland)

Disease-suppressive container mixes or compost:
- BioComp • Earthgro (Scotts) • Sun-Gro • Southern • Louisiana Pacific • O.M. Scotts (Hyponex) • Paygro

Micronutrients: Spray-N-Grow

Compost Tea Brewing Equipment: Growing Solutions • SoilSoup • Microb Brewer • Earth Tea

Endomycorrhizae to increase plant nutrition and help protect against disease:
- Glomus sp.(VAM fungus): Bioscientific (Mycorise) • BioOrganic • Green Releaf(BioReleaf) • Micro-Tek • Plant Health Care (Mycor) • Biological Crop • Natural Fertilizer • Philom (TagTeam) • Rincon-Vitova • AgBio • Roots • Mycorhizal Applications

Ectomycorrhizae (forest nurseries, urban trees):
- Pisolithus tinctorius: Rincon-Vitova • Plant Health Care (Mycortrees) • Plant Revolution • AgBio • Mycorhizal Applications
- Pisolithus, Rhizopogon mixtures: Roots • Plant Health Care

TREE WOUND PATHOGENS

Biological Control
- Trichoderma sp.: Binab (Binab-T), to treat tree wounds

TURF DISEASES

Identification & Monitoring
Detection kit for turf diseases:
- Neogen(Reveal) • Neogen (Alert)
Compost maturity test kit:
- Woods End (Solvita)

Physical Controls
Turf Aerator:
- Harmony, Peaceful Valley (Gorilla Core Aerator)
Horticultural Controls
Brown patch resistant turfgrass:
- Turf Seed (Tar Heel, Wolfpack, Coronado Gold, Olympic Gold)
Biological Controls

Microbial Soil Amendments:
New Era Farm Service (composted soil amendments) • Jade Mountain (composting toilet) • Northeast Organics (Turf Cocktail to stimulate microbials in soil) • Lane • Agro Dist
Beneficial microorganisms that attack turf pathogens:
Gardener’s Supply (Green Magic) • Green Releaf (BioReleaf) • Peaceful Valley (Restore) • Wilbur-Ellis (BioTrek) • BioWorks (Turfmate) • Eco-Soil (BioJect) • Soil Technologies (BacPack) • Natural Fertilizer • Plant Health Care (Compete)
